

As your vision needs change, there are still contact lenses for you.

We've corrected for your astigmatism, but lately, does it feel as if you need longer arms to read your text messages or the menu right in front of you?

You may be experiencing presbyopia which can make up-close objects appear blurry. Fortunately, there are contact lenses to bring those objects back into focus and correct your astigmatism: Biofinity® toric multifocal by CooperVision®.

With over 200,000 prescription options¹ available, they are made to fit your specific vision needs and offer exceptional vision and long-lasting comfort.

Call our office today to make an appointment and see if Biofinity® toric multifocal lenses are right for you.
